**MADE IN GREAT BRITAIN**

**SIMPLE**  
**UNIQUE**  
**HYGIENIC**  
**CONVENIENT**  
**COST EFFECTIVE**

## CYRUS TODIWALA OBE DL

FAMOUS UK BBC TV CHEF AND AUTHOR

USES THE MICROSAVE IN ALL HIS RESTAURANTS SAYS:

*"The Microsave is a simple, ingenious idea that protects the interior of our microwaves, saving us time and money. It's easily removed, washed and replaced for next service, time and time again avoiding burnt food particles which can cause scorched ceiling plates and cracked base plates.....*

*...it's simply brilliant"*

**When buying a microwave oven always make sure that it has a  
MICROSAVE® BRANDED CAVITY LINER INSIDE!**

# Make your kitchen more efficient and extend the life of your microwave

The **microSAVE**® Cavity Liner is an easily removable rigid protection for commercial microwave ovens. Easy to remove, clean and replace helping to avoid very costly repairs and down time.

## Hygienic

With full Worldwide NSF Certification, the **microSAVE**® will help to keep the microwave cavity spotlessly clean and looked after. It is also an 'Approved Product' by the UK's Craft Guild of Chefs.

All the operator has to do at the end of each session is to take the liner out, wash with washing up liquid and warm water, dry and replace back in the oven. Only take two minutes to clean !

# It Can save you money the price of our liner is less than the cost of one repair.....

## Avoid down time!

The Liner protects the entire microwave cavity from grease and food particles which, if left it can cause serious or even un-repairable damage to the microwave oven.

## Avoid Costly Repairs !

Food particles left on ceiling plates, base plates and light lens can cause serious damage to the interior of the microwave as the carbonise, cinder and then arc. A Microsave Cavity Liner in the microwave can eliminate all these problems!

## Great value for money!

## Don't take our word for it!

*We've been using the Microsave for years. it's brilliant, easy to use, cuts back on service maintenance and daily cleaning of our micro-waves and saves a lot of wear internally. We've seen a reduction in the amount spent on repairs and we barely see a microwave technician.....*

**Ryan Komneavy, Head Chef, Spyglass Inn.**

*The Microsave is a brilliant idea, the best thing ever! It saves money and time. Whenever I buy a new microwave I order a Microsave too. It's so simple - the person who invented it must have been a chef! Would 100% recommend it....*

**Satish Yerramilli, Executive Head Chef,  
Meon Valley A Marriott Hotel & Country Club.**

*This could happen to your microwave without a genuine micro**SAVE**® Liner!*

***SIMPLE - UNIQUE - HYGIENIC - CONVENIENT - COST EFFECTIVE,***  
**but what will it do for me?**

**It will save you money on repairs\***

**It will protect the Glass Ceramic Base Plate\***

**It will protect against Ceiling Plate burn-outs\***

**It will help you to avoid expensive downtime**

**It will keep your microwave oven hygienically clean**

**It will protect the microwave from splats and splashes**

**It could extend the life of your commercial microwave oven**

**YET COSTS LESS THAN ONE REPAIR**

**\*NO manufacturer will give a warranty on Ceiling Plates, Glass Ceramic Base Plates or Lens Light covers, it is termed 'customer mis-use'. If a service call is made and it is one of these problems then the service call and all parts will all be chargeable — the Microsave protect these alleviating this problem. LED lighting also avoids costly lamp replacement which is also chargeable if an engineer is called out to replace the lamps.**
